VIDHI JOSHI

vjoshi43@uwo.ca | London, ON, Canada | linkedin.com/in/vidhi-joshi-b2b08729a/

PROFESSIONAL SUMMARY

A motivated student pursuing a Bachelor's in Computer Science with a second major in Art History and Studio Arts at Western University. Combining technical expertise in programming (Python, HTML/CSS, Java, C) with a creative foundation, I am passionate about merging technology and artistry to create immersive experiences. From web applications to interactive graphics, I thrive at the intersection of innovation and creativity, crafting solutions that are both functional and visually compelling.

EDUCATION

Western University, London Ontario — September 2022 - October 2026

BSc. Honours, Major in Computer Science, Major in Art history and Studio Arts

PROFESSIONAL EXPERIENCE

Haudenosaunee POD | Western University London, ON, Canada — March 2025 - Present

Research Assistant

- Designed interactive research tools with embedded systems (Arduino + sensors) to support Indigenous data collection and storytelling practices.
- Enhanced research documentation efficiency by 30% through visual + written workflow systems.
- Strengthened team onboarding and interdisciplinary collaboration by streamlining cross-platform technical workflows.

Softsages Technology | India — May 2023 - August 2023

Internship

- Developed a WhatsApp/Telegram chatbot with Cloud API + Python webhooks, improving responsiveness and reducing user clicks by 40%.
- Reduced API response time by 25% through iterative debugging and endpoint testing in Flask.
- Supported a client-facing product launch by integrating 3 functional modules into a web app using agile, cross-functional collaboration.

PROJECTS & OUTSIDE EXPERIENCE

Chladni Plate Simulation and Installation | Thesis project

- Modeled cymatic sound-wave patterns with 90% accuracy using Max/MSP + Python, integrating scientific simulation and artistic visualization.
- Designed an interactive educational tool that merged HCI principles with sound-to-visual transformations, enabling embodied, multimodal learning.
- Explored the intersection of computation, materiality, and design by translating physical resonance phenomena into digital space.

Artispace Project | Personal Project

- Conceptualized and branded a digital ecosystem for artists to curate "Exhibitions," focusing on high-fidelity visual storytelling and portfolio customization.
- Designed a modular UI/UX system using Figma and React, prioritizing clean typography and minimalist layouts to ensure the user's artwork remains the focal point.
- Engineered high-quality media delivery pipelines using AWS S3 and CloudFront, ensuring that high-resolution graphic assets load seamlessly across mobile and desktop.
- Developed interactive social features and personalized discovery feeds, applying behavioral design principles to increase artist-to-collector engagement.

SKILLS

Computer Science & Technical:
Python, Java, HTML/CSS, React.js, Git, Linux, Data Structures & Algorithms, Tangible Computing (Arduino, Sensors) Front-End & Back-End Development, Databases

UX & Interaction Design
Figma, User-Centered Design, Wireframing, Journey Mapping, Interaction Design, Visual Hierarchy, Typography Accessibility Awareness

Design & Visualization
Adobe Creative Suite (Illustrator, Photoshop, Premiere Pro), Blender (3D Modeling), Interactive Storytelling, Prototyping

Research & Curatorial Practices
Design Thinking, Documentation, Indigenous Research Methods, Visual Storytelling, Cross-functional Teamwork, Sustainability-focused Design
